Yahya Kamal

Computer Science Engineering Student

Toulouse, France | yahyakmedu@gmail.com | linkedin.com/in/yahya-kamal-b06962370 | itsdaddict.github.io

Profile

Computer science engineering student at ENSEEIHT (Toulouse INP), coming from the Moroccan CPGE TSI track, with strong foundations in mathematics, physics and scientific problem-solving. Interested in AI and machine learning, especially their mathematical foundations, and keen to gain practical software and research experience.

Education

ENSEEIHT – Toulouse INP — Toulouse, France
Engineering degree, Computer Science (SN track) — *2026 – Present*

Moroccan CPGE, TSI track — Morocco
Classes préparatoires — *2024 – 2026*

- Two-year intensive programme in mathematics, physics and engineering sciences.

Academic Achievements

- **CCINP** competitive examinations: ranked 26th out of 1,418 candidates.
- **CNC** competitive examinations (Morocco): ranked 23rd.

Technical Skills

Programming: Ada (current coursework); Python (introductory, incl. basic object-oriented programming); HTML, CSS, JavaScript (early personal experimentation)
Systems: Linux user for about eight years; recent hands-on work on Arch Linux configuration and development workflows
Scientific foundations: mathematics, physics, abstraction and structured problem-solving (CPGE TSI)

Projects & Initiatives

Early programming experiments | *Unity, HTML/CSS/JavaScript, Python* — Middle & high school

- Built small Unity games and explored web development and Python independently.

Pixel art sales | *Digital art*

- Created and sold pixel art online as a teenager.

Interests & Languages

Interests: artificial intelligence and machine learning; computer science research; software development and entrepreneurship; Linux; strength training, basketball, running, hiking
Languages: Arabic, French, English, German (beginner)
